

Data Management & Analytics Assessment
Position
Data Management & Analytics Associate

Management Brief

The leadership team is reviewing the status of embassy outreach activities and requires a clear overview of current progress, engagement levels, and areas requiring attention.

You have been provided with an Embassy Outreach Database currently used by the organization. Your task is to analyze the data and prepare a dashboard and supporting summary that can help management:

- Understand the current status of outreach efforts.
- Identify gaps or issues in the available data.
- Monitor engagement across different embassies and regions.
- Support prioritization and future decision-making.

The dashboard should be designed for a leadership review meeting and should present information in a clear, concise, and actionable manner.

Assignment

Using the attached Embassy Outreach Database, complete the following:

1. Leadership Dashboard

Create an Excel dashboard that presents key information from the database in a structured and visually effective manner.

The dashboard should enable management to quickly understand the current status of embassy outreach activities and identify areas requiring attention.

You are free to determine which metrics, analyses, visualizations, and reporting structures are most relevant and useful.

2. Data Quality Review

Review the database and identify any data-quality issues, missing information, inconsistencies, or observations that may affect reporting, analysis, or operational decision-making.

Provide a brief summary of your findings.

3. AI Exercise

Use any AI tool of your choice to assist your analysis.

Submit a separate note containing:

- The AI tool(s) used
 - The prompt(s) used
 - How AI assisted your work
 - Any insights or recommendations generated through AI
-

4. Executive Summary

Prepare a concise summary (maximum one page) covering:

- Key observations from the database
 - Important data gaps or issues identified
 - Key recommendations for management
-

Submission Requirements

Excel Workbook

Including:

- Leadership Dashboard
- Data Quality Review

PDF Report

Including:

- Executive Summary
 - AI Exercise
-

Evaluation Criteria

Your submission will be assessed on:

- Excel proficiency
 - Analytical thinking
 - Attention to detail
 - Dashboard design and usability
 - Effective use of AI tools
 - Clarity of communication
-

Submission Timeline

Please submit your completed assessment within the timeline communicated to you.

We are not necessarily looking for the most complex dashboard. We are looking for accuracy, clarity, logical thinking, attention to detail, and the ability to convert data into useful and actionable information.

**Best Wishes,
Team Jyot**
